

DURASEIN ACRYLIC SOLID SURFACE CARE AND MAINTENANCE GUIDE

Durasein® Solid Surface is resistant to heat, stains, and scratching. However, it is not heat, stain or scratch proof. Following the guidelines for routine care and maintenance will keep Durasein looking fresh.

ROUTINE CARE AND CLEANING

- It is advised to wipe up spills on your Durasein Surface as they occur. Cleaning with soapy water and a damp cloth will remove most dirt.
- For a tougher stains, a cleaner with an ammonia-base (avoid window cleaner) can be used. Clean in a circular motion and make sure all excess moisture is wiped away.

For more stubborn stains:

Matte	Apply a mild abrasive cleaner with a damp sponge, buff in a circular motion, rinse, and towel dry
Semi Matte	Apply a mild abrasive cleaner with a damp sponge, buff in a circular motion, rinse, and towel dry
Semi Gloss	Apply soapy water and with a white Scotch-Brite™ pad rub in a circular motion. Then rinse and towel dry.
Gloss	Clean with mild detergents or nonabrasive cleaners with a soft cloth.

- Water marks can be removed by wiping the surface with a damp cloth followed up with a towel dry.
- Do not use harsh chemicals as the surface can be damaged by harsh substances; including chemicals such as paint thinner, mineral spirits, acetone or acetone based nail polish remover.
- Darker decors tend to require more attention than lighter colours.

HEAT

Due to its composition and strict manufacturing standards, Durasein products are naturally heat resistant, but they are not indestructible. It is important to minimize direct heat exposure from appliances to protect the surface.

- Avoid placing pans from the burner/element or oven directly on your countertop. Prolonged or extreme heat can cause discolouring and the thermal stress may cause cracking.
- Use heat trivets or hot pads when placing hot objects on any surface. Be sure they are designed to protect surfaces from heat. Towels or other cloths are not effective insulators.
- Use a trivet under portable heat generating electric fry pans and similar devices.
